EDUCATION

Vassar College

Poughkeepsie, NY

Bachelor of Computer Science | GPA: 3.97

- *Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Computer Organization, Analysis of Algorithms, Intermediate Data Science*
- *Affiliations: Career.edYOU, GS Virtual Insights, Codepath, Out In Tech U, O4U Digital*
- *Awards: Vassar DataFest 2025 - Best Data Visualization, HackNights: Best use of Gemini API*

EXPERIENCE

Full-Stack Software Developer Intern

Jun. 2025 – Present

FPT Information Systems (FIS)

Hanoi, Vietnam

- Developed the master data table management dashboard (React.js, Ant Design) for a production service, streamlining data matching and merge workflows and contributing to a 35% reduction in duplicate records across a 500K+ record dataset.
- Defined JSON response schemas and integrated the dashboard with existing FastAPI endpoints and proprietary APIs, enabling near-real-time updates and reducing data refresh latency by 40% for this workflow.

Computer Science Teaching Assistant

Aug. 2025 – Present

Vassar College

Poughkeepsie, NY

- Mentored 90+ students in multiple computer science classes, fostering inclusion and improving assignment submission rates by 15% through examples using Python, NumPy, and Pandas.
- Reviewed 70+ Java, OCaml, and Python projects to strengthen debugging and algorithmic reasoning, cutting recurring logic errors by 20% and helping raise class exam averages through hosting review sessions.

Full-Stack Software Developer

Jun. 2025 – Present

FinDash.AI

Poughkeepsie, NY

- Developed a secure ingestion and normalization pipeline that converts raw Excel/CSV/10-K/10-Q filings into structured canonical JSON using Fastify, Pandas, and pdfplumber.
- Implemented the analytics and insights layer that computes financial KPIs (DuPont, liquidity, solvency, profitability, YoY/QoQ) and powers an OpenAI-based chatbot for real-time analysis, increasing user insight discovery by 3x.

Engineering Makerspace Lab Assistant

Aug. 2024 – Present

Vassar College

Poughkeepsie, NY

- Assisted **200+ students and professors** by troubleshooting 3D printers, laser cutters, and resin printers, using firmware knowledge and CAD slicing software to quickly resolve hardware/software issues
- Developed simple **Python** scripts for routine maintenance checks through generating G-code test patterns and automating bed-level calibration tests.

LEADERSHIP & CAMPUS ACTIVITIES

Outreach Chair

May. 2025 – Present

VC++

Poughkeepsie, NY

- Built relationships with 10+ tech companies and alumni to organize mentorship and recruiting events, increasing member participation in career programming by 40%.
- Introduced digital sign-ups and post-event surveys to track attendance and feedback, improving attendance consistency by 35% and raising post-event satisfaction scores to 70%.

PROJECTS

OBRE | *Android, Java, OpenCV, Gemini, Google Cloud, YOLOv12, Firebase* [Link](#)

Feb. 2025 – Present

- Developed an accessibility-first Android app, providing real-time object + custom object recognition from live video using OpenCV + YOLO through using NMS algorithm and YUV color channel translation, with scene/photo description, OCR via ML Kit, and audible narration through on-device text-to-speech.
- Architected the system using modular MVC patterns and Agile iteration (pair programming + rapid prototyping) to deliver inclusive, hands-free interaction and production-ready extensibility.

Nutrilens | *Next.js, TypeScript, Python, Gemini API, OpenCV, Tesseract* [Link](#)

Feb. 2025 – Present

- Built a full-stack AI nutrition assistant with a Python backend and Next.js/TypeScript frontend, supporting structured extraction of medication and nutrition data.
- Designed an ingestion + parsing workflow that converts OCR output into queryable nutrition fields instead of raw text, delivering a product-ready user experience (Best Use of Gemini API).

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, OCaml, SQL, Swift

Tools: PostgreSQL, REST API, Git, Machine Learning

Frameworks: React.js, Node.js, Express.js, Bootstrap, Ant Design, FastAPI, Fastify
